

# Ireland

## Medical Summary

*The health risk information presented here is summarized from Shoreland Travax<sup>®</sup>, a decision-support tool used by health care providers to perform a detailed health risk analysis based on specific locations, individual travel styles, and traveler risk behaviors. Travax provides practitioners current, independently researched malaria risk and prevention recommendations in a map-based format that goes beyond the annual WHO and CDC statements included here. Not included here are current reports from Travax of disease outbreaks or environmental events that may pose elevated risks to travelers' health and safety. The Providers section of this site offers a directory of health care providers who utilize Shoreland Travax for travel health counseling. Learn more about the detailed reports and maps available from these practitioners (includes links to samples).*

## General Information

Ireland is an advanced economy classified as high income. Located in the Atlantic Ocean (west of the U.K.), the climate is classified as humid temperate (no dry season).

## Immunizations

Depending on your itinerary, your personal risk factors, and the length of your visit, your health care provider may offer you vaccination against hepatitis B, influenza, measles, mumps, rubella, meningococcal meningitis, or rabies. Routine immunizations, such as those that prevent tetanus/diphtheria or "childhood" diseases, should be reviewed and updated as needed.

## Malaria

The following is current information as reported by the World Health Organization (WHO) and the U.S. Centers for Disease Control (CDC):

### **WHO—*International Travel and Health* (current online update, Country List)**

No statement given.

### **CDC—*Health Information for International Travel* (current online edition)**

Areas with malaria: None.

Drug resistance: Not applicable.

## Other Concerns

### **Travelers' Diarrhea**

Minimal risk exists throughout the country. Community sanitation is generally good, and health concerns related to food and beverages are minimal.

Travelers should carry loperamide for self-treatment of diarrhea and, if risk is moderate to high, an antibiotic to add if diarrhea is severe. Consult a knowledgeable health care provider regarding which antibiotic is appropriate for you and most effective for your destination.

### **Insect- and Arthropod-Borne Diseases**

Lyme disease may pose a risk. Personal protective measures are important.

## Consular Advice

*The material below includes information from the U.S. Department of State (DOS), U.K. Foreign & Commonwealth Office (FCO), Global Affairs Canada (GAC), and Australia's Department of Foreign Affairs and Trade (DFAT), as well as from additional open-source material. Standard safety precautions that apply to all international travel can be found in the Library*

## Terrorism Risk

Risk of attack by transnational terrorist groups exists throughout Europe. Low risk of attack by domestic terrorist groups exists throughout the country, especially in northern areas. Targets may include public places and events, including those frequented by tourists, and transportation systems.

## Crime

Low risk of violent crime (armed robbery and assault) and moderate risk of petty crime exist in large cities (especially in Dublin), particularly in secluded parks, unlit areas, and areas frequented by tourists.

## Civil Unrest

Protests and demonstrations may infrequently occur and have the potential to turn violent without warning.

## Water Safety

Rent water sports equipment from reputable operators. Scuba dive only with personnel certified by PADI or NAUI, and use equipment only from PADI- or NAUI-certified dive operators.

## Transportation Safety

Low risk of traffic-related injury or death exists. The road-traffic death rate is less than 7 per 100,000 population, the lowest risk category.

Traffic flows on the left-hand side of the road. Travelers (including drivers and pedestrians) accustomed to traffic moving on the opposite side should be vigilant when navigating traffic.

## Airline Safety

U.S. Federal Aviation Administration has determined that the civil aviation authority of this country oversees its air carriers in accordance with minimum international safety standards.

## Consular Information

Selected Embassies or Consulates in Ireland

- | United States: [+353] 1-668-8777; [ie.usembassy.gov](http://ie.usembassy.gov)
