

Saint Vincent and the Grenadines

Medical Summary

The health risk information presented here is summarized from Shoreland Travax[®], a decision-support tool used by health care providers to perform a detailed health risk analysis based on specific locations, individual travel styles, and traveler risk behaviors. Travax provides practitioners current, independently researched malaria risk and prevention recommendations in a map-based format that goes beyond the annual WHO and CDC statements included here. Not included here are current reports from Travax of disease outbreaks or environmental events that may pose elevated risks to travelers' health and safety. The Providers section of this site offers a directory of health care providers who utilize Shoreland Travax for travel health counseling. Learn more about the detailed reports and maps available from these practitioners (includes links to samples).

General Information

Saint Vincent (a single island) and the Grenadines (32 smaller islands) is a developing nation but is in the upper half of the world's economies. Located in the Caribbean Sea, the climate is classified as humid equatorial (no dry season).

Immunizations

Yellow Fever

Although yellow fever does not occur in Saint Vincent and the Grenadines, an official yellow fever vaccination certificate may be required depending on your itinerary.

- ▮ *Requirement:* A vaccination certificate is required for travelers aged ≥ 1 year coming from countries with risk of YF transmission. Note: This does not apply to airport transit stops (no exit through immigration checkpoint) in risk countries.

Other Vaccines

Depending on your itinerary, your personal risk factors, and the length of your visit, your health care provider may offer you vaccination against hepatitis A, hepatitis B, influenza, measles, mumps, rubella, rabies, or typhoid fever. Routine immunizations, such as those that prevent tetanus/diphtheria or "childhood" diseases, should be reviewed and updated as needed.

Malaria

The following is current information as reported by the World Health Organization (WHO) and the U.S. Centers for Disease Control (CDC):

WHO—*International Travel and Health* (current online update, Country List)

No statement given.

CDC—*Health Information for International Travel* (current online edition)

Areas with malaria: None.

Drug resistance: Not applicable.

Other Concerns

Travelers' Diarrhea

Moderate risk exists throughout the country, including in deluxe accommodations. Food and beverage precautions may reduce the likelihood of illness.

Travelers should carry loperamide for self-treatment of diarrhea and, if risk is moderate to high, an antibiotic to add if diarrhea is severe. Consult a knowledgeable health care provider regarding which antibiotic is appropriate for you and most effective for your destination.

Other Food-Borne Illnesses

Precautions to prevent seafood poisoning may be needed.

Insect- and Arthropod-Borne Diseases

Chikungunya, dengue, Zika may pose a risk. Personal protective measures are important.

Other Disease and Health Risks

Additional concerns include helminths, marine hazards.

Consular Advice

The material below includes information from the U.S. Department of State (DOS), U.K. Foreign & Commonwealth Office (FCO), Global Affairs Canada (GAC), and Australia's Department of Foreign Affairs and Trade (DFAT), as well as from additional open-source material. Standard safety precautions that apply to all international travel can be found in the Library article Safety and Security.

Terrorism Risk

No intrinsic risk of attack by terrorist groups exists, but unforeseen attacks are possible.

Crime

Low risk of violent crime (armed robbery, home invasion, sexual assault, carjacking, and murder) and petty crime exist throughout the country, mainly in remote areas (including beaches) and on yachts.

Water Safety

Hazardous water conditions (including currents, tides, and undertows) may occur, especially in Trinity Falls and Mount Wynne Beach. Heed posted warnings and avoid beaches that are not patrolled. Do not swim alone or after dark, and do not walk on any beach after dark.

Basic safety standards for recreational water activities (including scuba diving, snorkeling, jet-skiing, kayaking, and tubing) may not be in place. Rent water sports equipment from reputable operators. Scuba dive only with personnel certified by PADI or NAUI, and use equipment only from PADI- or NAUI-certified dive operators.

Transportation Safety

Risk of traffic-related injury or death exists. The road-traffic death rate is 7 to 12 per 100,000 population. The rate is less than 10 in most high-income countries.

Traffic flows on the left-hand side of the road. Travelers (including drivers and pedestrians) accustomed to traffic moving on the opposite side should be vigilant when navigating traffic.

Airline Safety

U.S. Federal Aviation Administration has determined that the civil aviation authority of this country oversees its air carriers in accordance with minimum international safety standards.

Natural Disasters

The hurricane season is from June through November. Floods, mudslides, and landslides may occur.

Volcanic activity occurs.
