

Timor-Leste

Medical Summary

The health risk information presented here is summarized from Shoreland Travax[®], a decision-support tool used by health care providers to perform a detailed health risk analysis based on specific locations, individual travel styles, and traveler risk behaviors. Travax provides practitioners current, independently researched malaria risk and prevention recommendations in a map-based format that goes beyond the annual WHO and CDC statements included here. Not included here are current reports from Travax of disease outbreaks or environmental events that may pose elevated risks to travelers' health and safety. The Providers section of this site offers a directory of health care providers who utilize Shoreland Travax for travel health counseling. Learn more about the detailed reports and maps available from these practitioners (includes links to samples).

General Information

Timor-Leste, a portion of the island of Timor and the islands of Pulau Atauro and Pulau Jaco, is a developing nation classified as lower middle income. Located in Southeast Asia in the Timor, Banda, and Savu seas (north of Australia), the climate is classified as humid equatorial (long dry season).

Immunizations

Yellow Fever

- Requirement: No requirement for any traveler as of July 1, 2019 per the 2019 online update of *International Travel and Health*.

Other Vaccines

Depending on your itinerary, your personal risk factors, and the length of your visit, your health care provider may offer you vaccination against hepatitis A, hepatitis B, influenza, Japanese encephalitis, measles, mumps, rubella, rabies, or typhoid fever. Routine immunizations, such as those that prevent tetanus/diphtheria or "childhood" diseases, should be reviewed and updated as needed.

Malaria

The following is current information as reported by the World Health Organization (WHO) and the U.S. Centers for Disease Control (CDC):

WHO—*International Travel and Health* (current online update, Country List)

(2019) Malaria risk due predominantly to *P. falciparum* exists throughout the year in the entire country.

- Recommended prevention: **C** – Risk of *P. falciparum* malaria, in combination with reported chloroquine and sulfadoxine–pyrimethamine resistance. Mosquito bite prevention plus atovaquone–proguanil or doxycycline or mefloquine chemoprophylaxis (select according to reported side effects and contraindications) ^a
^aAlternatively, for travel to rural areas with low risk of malaria infection, mosquito bite prevention can be combined with stand-by emergency treatment (SBET).

WHO Country List footnote: When available, the date of the most recent update or confirmation is indicated in parentheses in the country list. If no date is indicated, the most recent update or confirmation was provided before 2013.

CDC—*Health Information for International Travel* (current online edition)

Areas with malaria: All.

- Estimated relative risk of malaria for US travelers: Moderate.
- Drug resistance⁴: Chloroquine.
- Malaria species: *P. falciparum* 50%, *P. vivax* 50%, *P. ovale* < 1%, *P. malariae* < 1%.
- Recommended chemoprophylaxis: Atovaquone-proguanil, doxycycline, or mefloquine.

⁴ Refers to *P. falciparum* malaria unless otherwise noted.

Other Concerns

Travelers' Diarrhea

High risk exists throughout the country, with moderate risk in deluxe accommodations. Food and beverage precautions may reduce the likelihood of illness.

Travelers should carry loperamide for self-treatment of diarrhea and, if risk is moderate to high, an antibiotic to add if diarrhea is severe. Consult a knowledgeable health care provider regarding which antibiotic is appropriate for you and most effective for your destination.

Other Food-Borne Illnesses

Precautions to prevent seafood poisoning may be needed.

Insect- and Arthropod-Borne Diseases

Chikungunya, dengue, Zika may pose a risk. Personal protective measures are important.

Other Disease and Health Risks

Additional concerns include helminths, leptospirosis, marine hazards, snakebites, tuberculosis.

Consular Advice

The material below includes information from the U.S. Department of State (DOS), U.K. Foreign & Commonwealth Office (FCO), Global Affairs Canada (GAC), and Australia's Department of Foreign Affairs and Trade (DFAT), as well as from additional open-source material. Standard safety precautions that apply to all international travel can be found in the Library article Safety and Security.

Terrorism Risk

No intrinsic risk of attack by terrorist groups exists, but unforeseen attacks are possible.

Crime

Moderate risk of violent crime (armed robbery, home robbery, sexual assault [including verbal and physical harassment], gang-related violence, and assault) and petty crime exists throughout the country, especially in Dili (particularly in areas frequented by foreigners, such as beaches and Timor Plaza). Theft of valuables from unattended vehicles is common.

Civil Unrest

Protests and demonstrations occur throughout the country, especially near government buildings and Presidente Nicolau Lobato International Airport, and have the potential to turn violent without warning. Bystanders are at risk of harm from violence or from the response by authorities. Disruption to transportation, free movement, or the ability to carry out daily activities may occur.

Unsafe Areas

Landmines and other unexploded ordnance may be present in rural areas.

Piracy (involving commercial and private, leisure vessels) occurs in coastal and international waters.

Water Safety

Rent water sports equipment from reputable operators. Scuba dive only with personnel certified by PADI or NAUI, and use equipment only from PADI- or NAUI-certified dive operators.

Other Safety Threats

Risk exists for fatal wildlife attacks from crocodiles in coastal areas and in-land waterways, especially along the southern coast. Travelers should closely follow regulations from local authorities and always maintain a safe distance from wildlife.

Transportation Safety

High risk of traffic-related injury or death exists. The road-traffic death rate is 12 to 24 per 100,000 population. The rate is less than 10 in most high-income countries. Speed laws are poorly enforced. Driving at night is not advised. Seek local advice before traveling on roads outside urban areas after dark.

Traffic flows on the left-hand side of the road. Travelers (including drivers and pedestrians) accustomed to traffic moving on the opposite side should be vigilant when navigating traffic.

Public buses, public vans, and taxis do not meet international safety standards (due to unsafe vehicles, poor maintenance, and hazardous driving).

Natural Disasters

The monsoon season is from November through April, coinciding with the cyclone season. Floods, mudslides, and landslides may occur.

Seismic activity frequently occurs.

Consular Information

Selected Embassies or Consulates in Timor-Leste

- | United States: [+670] 332-4684; tl.usembassy.gov
- | Canada: Canada does not have an embassy or consulate in Timor-Leste.
- | United Kingdom: U.K. does not have an embassy or consulate in Timor-Leste.
- | Australia: [+670] 332-2111; timorleste.embassy.gov.au

Timor-Leste's Embassies or Consulates in Selected Countries
